

Barrington Stoke and large print books

We have a wide selection of dyslexia-friendly books that are specifically designed to help students enjoy reading. Barrington Stoke books are a range of accessible, enjoyable and unpatronising short books for students who are either dyslexic , struggling to read, or simply reluctant to sit down with a book.

While large-print books are typically associated with older readers or people with visual disabilities, the appeal of large-print books is much broader than many people realize. Students of all reading abilities are drawn to our large print books. Large print can specifically help with word decoding and tracking, which facilitates concentration, reading enjoyment and comprehension overall.
